**PART A – EXPLANATORY NOTES PURSUANT TO
MALAYSIAN FINANCIAL REPORTING STANDARD 134**

1 BASIS OF PREPARATION

The significant accounting policies and methods adopted for the unaudited condensed financial statements are consistent with those adopted for the audited financial statements for the financial year ended 31 January 2017.

The adoption of the following MFRSs and Amendments to MFRSs that came into effect on 1 February 2017 did not have any significant impact on the unaudited condensed consolidated financial statements upon their initial application.

- Amendments to MFRS 107 Disclosure Initiative (effective from 1 January 2017)
- Amendments to MFRS 112 Recognition of Deferred Tax Asset for Unrealised Losses (effective from 1 January 2017)
- Amendments to MFRS 12 Disclosure of Interests in Other Entities (effective from 1 January 2017)

1 BASIS OF PREPARATION (continued)

The initial application of the aforementioned accounting standards and amendments to published standards are not expected to have any material impacts to the financial statements of the Group, except as mentioned below:

MFRS 9 Financial Instruments

This complete version of MFRS 9 replaces all previous versions of MFRS 9. The standard introduces new requirements for classification and measurement of financial instruments, impairment of financial assets and hedge accounting. The approach for classification of financial assets is driven by cash flow characteristics and the business model in which an asset is held of which financial assets such as investment in debt instruments can be classified into three categories; amortised costs, fair value through other comprehensive income (“FVOCI”) and fair value through profit or loss (“FVTPL”), equity instrument shall be measured at fair value while classification and measurement of financial liabilities have been retained: FVTPL and amortised cost. For impairment, MFRS 9 introduces an expected-loss impairment model which will require more timely recognition of expected credit losses to reflect changes of credit risk of financial instruments. For hedge accounting, the general hedge accounting requirements have been simplified for hedge effectiveness testing and permit hedge accounting to be applied to a greater variety of hedging instruments and risks. MFRS 9 is to be applied retrospectively but comparative are not required to be restated.

The Group is currently assessing the financial impact of adopting MFRS 9.

MFRS 15 Revenue from Contracts with Customers

MFRS 15 replaces MFRS 118 Revenue and MFRS 111 Construction contracts and related interpretations. The standard deals with revenue recognition and establishes principles for reporting useful information to users of financial statements about the nature, amount, timing and uncertainty of revenue and cash flows arising from an entity’s contracts with customers.

Revenue is recognised when a customer obtains control of a good or service and thus has the ability to direct the use and obtain the benefits from the good or service. The core principle in MFRS 15 is that an entity recognises revenue to depict the transfer of promised goods or services to customer in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services.

The Group is currently assessing the financial impact of adopting MFRS 15.

2 SEASONAL/CYCLICAL FACTORS

The operations of the Group were not significantly affected by seasonal and cyclical factors.

3 UNUSUAL ITEMS

There were no unusual items affecting the assets, liabilities, equity, net income or cash flows of the Group in the second quarter ended 31 July 2017.

4 MATERIAL CHANGES IN ESTIMATES

13 ANALYSIS OF PERFORMANCE (continued)

- (a) Performance of the current quarter (Second Quarter FY18) against the corresponding quarter (Second Quarter FY17) (continued):

Consolidated Performance

Revenue

Revenue for the current quarter of RM1,419.7m was lower by RM8.6m or 0.6% against corresponding quarter of RM1,428.3m. This was mainly due to a decrease in subscription and licensing revenue. The decrease was offset by an increase in advertising revenue. Higher advertising revenue in the current quarter contributed by higher Hari Raya advertisement spending recorded in the current quarter.

EBITDA margin

EBITDA margin increased by 9.0% against corresponding quarter mainly due to proportion of content costs against revenue has decreased.

Net Profit

Net profit increased by RM120.8m or 97.2% compared with the corresponding quarter due to increase in EBITDA and decrease in net finance costs, offset by higher tax expense. Lower net finance cost was due to favorable unrealised forex gain arising from unhedged non-current balance sheet liabilities comprising, finance lease liabilities and vendor financing.

Television

Revenue for the current quarter of RM1,259.5m was lower by RM7.4m or 0.6% against corresponding quarter of RM1,266.9m. 13 ANALYSIS OF PERFORMANCE (continued)

- (a) Performance of the current quarter (Second Quarter FY18) against the corresponding quarter (Second Quarter FY17) (continued):

Consolidated Performance (continued)

Radio

Radio's revenue for the current quarter of RM88.7m was higher by RM2.2m or 2.5% compared with the corresponding quarter of RM86.5m. The higher revenue performance was driven by the yield and inventory management, supported by its continuous strong listenership ratings for its radio brands.

Radio EBITDA for the current quarter of RM47.9m, decreased by RM4.2m or 8.1% against the corresponding quarter, due to higher operating cost which were mainly marketing-related.

Home-shopping

Home-shopping's revenue for the current quarter of RM70.3m was lower by RM4.0m compared with the corresponding quarter of RM74.3m. The lower revenue performance was primarily due to additional tactical campaigns executed for the current quarter.

14 PROSPECTS FOR THE FINANCIAL YEAR ENDING 31 JANUARY 2018

The Group is cautiously optimistic for the rest of the financial year, despite relatively subdued consumer sentiment. As the Group's operating environment is facing disruption, the Group is re-positioning its business with emphasis towards personalisation, mobility and interactivity with customers, focusing on executing its key strategies on:

- (1) digitalising our legacy business via investments in technology to accelerate our digital transformation, launching OTT streaming services in Astro Go and Njoi Now, and providing differentiated products, services and content;
- (2) rapidly scaling our digital ventures via our e-commerce platform, Go Shop and our regional OTT streaming service, Tribe, with Tribe launched in Thailand recently in August 2017; and
- (3) deepening strength in verticals and building a robust innovation pipeline via collaborative partnerships with leading content players to drive revenue growth.

Our combined TV viewership, radio listenership and digital users are uniquely placed to assist advertisers to engage with consumers across all demographics, which will continue to drive monetisation and Adex performance.

We continue to actively manage our key operating expenses, particularly content costs which are substantially USD denominated, and optimising our cost to serve.

On the basis of the above, the Board believes the Group will remain cash generative and will focus on investing in our growth strategy.

(b) Disclosure of gains/(losses) arising from fair value

The Group determines the fair values of the derivative financial instruments relating to the FX Contracts using valuation techniques which utilise data from recognised financial information sources. Assumptions are based on market conditions existing at each balance sheet date. The fair values are calculated at the present value of the estimated future cash flow using an appropriate market based yield curve. As for IRS, CCIRS and FX options, the fair values were obtained from the counterparty banks.

As at 31 July 2017, the Group recognised net total derivative financial assets of RM260.4m, a decrease of RM175.0m from the previous financial year ended 31 January 2017, on re-measuring the fair values of the derivative financial instruments. The corresponding decrease of RM175.5m has been included in equity in the hedging reserve and offset by increase in net accrued interest of RM0.5m.

Forward foreign currency exchange contracts and foreign currency options

Forward foreign currency exchange contracts are used to manage the foreign currency exposures arising from the Group's payables denominated in currencies other than the functional currencies of the Group.
