**Consolidated Performance**

**Revenue**

Revenue for the current quarter of RM1,424.1m was higher by RM49.7m or 3.6% against corresponding quarter of RM1,374.4m. This was mainly due to an increase in subscription, advertising, home-shopping and other revenue of RM6.5m, RM26.6m, RM10.1m and RM6.5m respectively.

Radio's revenue for the current quarter of RM83.2m was higher by RM8.1m compared with the corresponding quarter of RM75.1m. The higher revenue performance was driven by effective yield and inventory management and the continuous strong listenership performance for its radio brands.

Home-shopping's revenue for the current quarter of RM62.4m was higher by RM10.1m compared with the corresponding quarter of RM52.3m. The higher revenue performance was due to increase in number of products sold.

**EBITDA margin**

**Net Profit**

Net profit increased by RM45.3m or 43.8% compared with the corresponding quarter. The increase in net profit is mainly due to decrease in depreciation of property, plant and equipment by RM32.6m and lower net finance cost by RM67.2m, offset by decrease in EBITDA of RM4.7m, impairment of investment in associate of RM15.1m and higher tax expenses by RM27.0m. Lower net finance cost was due to lower unrealised forex loss arising from unhedged finance lease liabilities of RM48.8m and unhedged vendor financing of RM8.9m.

**Cash Flow**

Increase in cash of RM29.9m as compared with corresponding quarter is mainly due to lower purchase of property, plant and equipment and intangibles by RM25.4m, disposal of unit trusts of RM78.8m and maturities of bonds of RM5.0m. This was offset by lower operating cash flow of RM31.5m, higher dividend paid by RM13.1m and higher payment for set-top boxes of RM38.3m.

**20 DERIVATIVE FINANCIAL INSTRUMENTS (continued)**

**(a) Disclosure of derivatives (continued)**

There have been no changes since the end of the previous financial year ended 31 January 2016 in respect of the following:

- (i) the market risk and credit risk associated with the derivatives as these are used for hedging purposes;
- (ii) the cash requirements of the derivatives;
- (iii) the policies in place for mitigating or controlling the risks associated with the derivatives; and
- (iv) the related accounting policies.

**(b) Disclosure of gains/(losses) arising from fair value**

The Group determines the fair values of the derivative financial instruments relating to the FX Contracts using valuation techniques which utilise data from recognised financial information sources. Assumptions are based on market conditions existing at each balance sheet date. The fair values are calculated at the present value of the estimated future cash flow using an appropriate market based yield curve. As for IRS, CCIRS and FX options, the fair values were obtained from the counterparty banks.

As at 31 October 2016, the Group recognised net total derivative financial assets of RM342.7m, an increase of RM2.6m from the previous financial year ended 31 January 2016, on re-measuring the fair values of the derivative financial instruments. The corresponding decrease of RM3.8m has been included in equity in the hedging reserve and RM1.3m were charged to income statement as fair value gain on derivative, offset by RM2.5m charged to interest expenses. For the current period, RM1.5m of the hedging reserve was transferred to the income statement to offset the unrealised loss of RM1.5m which resulted from the strengthening of USD against RM. This resulted in an increase on the credit balance in the hedging reserve as at 31 October 2016 by RM2.3m to RM5.4m compared with the financial year ended 31 January 2016.

Forward foreign currency exchange contracts and foreign currency options

Forward foreign currency exchange contracts are used to manage the foreign currency exposures arising from the Group's payables denominated in currencies other than the functional currencies of the Group. The forward foreign currency exchange contracts have maturities of less than one year after the balance sheet date, while foreign currency options were entered into for a period of up to 6 years. As at 31 October 2016, the notional principal amounts of the outstanding forward foreign currency exchange contracts were RM1,249.6m (31 January 2016: RM1,125.3m) and foreign currency options were USD36.5m (31 January 2016: USD14.0m).

Interest rate swaps

Interest rate swaps are used to achieve an appropriate interest rate exposure within the Group. The Group entered into interest rate swaps to hedge the cash flow risk in relation to the floating interest rate of a bank loan, as disclosed in Note 19 with notional principal amounts of RM1,125.0m (31 January 2016: RM1,200.0m) and vendor financing, as disclosed in Note 21 with notional principal amounts of RM407.0m and USD18.8m (31 January 2016: RM505.5m and USD20.4m).

The interest rate swaps for bank loan were entered up to 10 years with an average fixed swap rate of 4.15% (31 January 2016: 4.15%).

The Ringgit and USD dollar interest rate swaps for vendor financing were entered into for a period of up to 3 years with an average fixed swap rate of 3.74% (31 January 2016: 3.79%) and 1.89% (31 January 2016: 0.86%) respectively.
